Re: Tablet Command Project Update

Dear Redbud Community Health Board.

On behalf of the Lake County Fire Chiefs Association, we would like to again thank you for your continued support of the Lake County Fire Chiefs Association in maintaining a high standard of fire, EMS, and rescue services to our communities. We also wanted to provide an update on the Tablet Command project you so generously funded for us. We have been online with the 40 tablets for several months now and are becoming more fluid with its capabilities. We have managed numerous wildland fires, structure fires and even a periodic rescue operation and found the system has met our expectations with the ability to manage, coordinate and ensure accountability of all resources responding, arriving and demobilization, which allows them real-time availability to be re-dispatched to a new incident. We appreciate your support for this project. It's a new tool in our toolboxes to effectively and efficiently manage our resources and coordinate incidents. If you would like we would be more than willing to attend one of your meetings and provide another demonstration. If you have any questions, please feel free to contact me and have a great day.

Respectfully submitted

Willie Sapeta, President  
Lake County Fire Chiefs Association
